

Employment Skip Tracing has contracted with Forward Slash Technology to perform Quarterly Vulnerability Scans, Vulnerability Risk Assessment and Mitigation using [Nexpose by Rapid7](#) for Internal Network Scan and Qualys for an External Network Scan. Forward Slash Technology concluded the last Quarterly Scan, 07/11/2017.

Forward Slash Technology also performs annual Information Technology policy reviews for Employment Skip Tracing in accordance with [CIS \(Center for Internet Security\) Critical Security Controls Version 6.0 recommendations](#). This entails reviewing Employment Skip Tracing's Information Technology Policies to ensure they are up to date and that procedures in the policies are being followed and documented. Forward Slash Technology performed the last Annual Review in December of 2016.
